SUMMARY:

Results-oriented Frontend Developer with a strong foundation in software engineering principles. Experienced in Java and React application development, with a demonstrated ability to architect, develop, and implement innovative solutions. Proficient in AWS and backend development, eager to leverage skills and passion for technology to contribute effectively as a Software Engineer.

TECHNICAL SKILLS:

- **Languages:** JavaScript, Python, Java
- **Frontend:** REACT JS, Next-JS, Vite-JS, Tailwind CSS, Html5, CSS3
- **Backend:** Node-JS, Express-JS
- **DevOps:** AWS (EC2, S3, Lambda), Jenkins
- **Databases:** MySQL, MongoDB
- **Tools & Technologies:** Web Apps

EXPERIENCE:

Intern - Exposys Data Lab | May 2023 – June 2023

- Collaborated with cross-functional teams to design and develop the UI for Mass Mail Dispatcher, enhancing user experience and efficiency.
- Utilized EmailJS API for bulk email dispatching, contributing to improved communication strategies.

PROJECTS:

- **iNoteBook:** January 2024
Created an end-end note taking app using REACT and for backend used MongoDB. The web app stores notes for specific user and also provides authentication by usage of auth token which hashes the password of user as in when new user gets created into database, adding security to database and app. [Source code](#)
- **E-Commerce Web App:** November 2023
Created an e-commerce website for family-owned offline business of nuts and bolts. Used react, bootstrap, material Ui, etc. Worked with material UI and REACT framework for developing a complete working E-Commerce Web App. [Source code](#)
- **Mail Dispatcher:** May 2023
Created frontend for project assigned related to Mass Mail Dispatcher. Used EmailJS with HTML, CSS and JavaScript Knowledge. Worked over the sending various emails at one time to many people using EmailJS API which allowed 200 email messages to be send at once. [Source code](#)
